Guideline for drone Still Photography/Videography

1. Ortho mosaic image of at least 3 cm resolution should be captured.
2. Elevation data such as height of building should also be captured.
3. Drone photography should include the aerial imagery showing monument in its setting and immediate landscape or urban fabric in the vicinity (at least 300 mtr. around the monuments).
4. In case of drone videography, the monuments and its buffer should be clearly captured. Aerial photos should also capture landscape details and land features.
5. Vertical and oblique angle of photographs/ Videos may be taken for capturing topological mapping of monument setting and wider landscape.
6. Close up of the monument/architectural details should also be captured wherever necessary.

Terms & Conditions

1. The rates should be quoted mentioning all terms & conditions such as taxes etc.
2. The transportation for the said work will be provided by the circle office.
3. Number of monuments for videography/photography may increase or decrease and may also be changed as per necessity.
4. The payment will be made after completion of the works.
5. The competent authority reserves the right to accept or reject any or all quotations without assigning any reasons thereof.
